Factsheet

Nestled on the protected UNESCO Biosphere Reserve of Baa Atoll, Dhigufaru Island meaning “a long reef”, is the epitome of what you would imagine as an exotic getaway. Whether you like to kick back, relax & take in the magnificent, stunning beauty of the island and surrounding reef, or if you are looking for a more action pack, exotic adventure, we offer the perfect balance of both.

The Island

The island is only 35000 square meters, but what it lacks in physical size, it makes up for in its distinctive natural character. The main feature of the island is its surrounding expansive reef, but the island itself has very characteristic natural features, making each part of the island quite unique and special in its own way.

Boaku On the eastern face of the island, is the Boaku, a sheltered beach, shaped like a cove, allowing the formation of a natural pool. The seclusion and stillness of the water inside Boaku, makes it perfect setting to catch the sunrise and as well as secure place to let your children play.

Veli On the very western face is Veigandu, a very wide and expansive flat beach of pure white sand, with crystal clear turquoise water that goes on and on. Most magnificent & stunning backdrop to view the sunset.

Getting to the Island

Dhigufaru Island is located on a World Renowned UNESCO Biosphere Reserve, Baa Atoll. You have the choice of flying directly to Dhigufaru via Sea plan, which will be approximately 40 minutes from Male' International Airport, or take the domestic schedule flight to Baa Atoll Dharavandhoo Domestic Airport, which is approximately 20 minutes, and our friendly team will be there to escort you to our speed boat, which will take your to the island in 30 minutes.
